

# Outdoor Scoreboards

NW4533

NW4535

NTT33121YW

## Sports

This outdoor scoreboard is made for stadiums, where only time and points are needed to be shown e.g. soccer.

## Function

The NW4533 and NW4535 are controlled by a NT Terminal, which makes it easy to change score and show the time. You can switch between game-clock or time of day mode.

Both the text display in the top and the advertising text display in the bottom is controlled from a PC. With the PC-software you can show team name, player name or use it for advertising. Anything you want can be written and seen.

## Mechanical

The scoreboards are built with weatherproof lightweight aluminium frames and back plates. The special LED digits which spreads the light 70 degrees horizontally and 30 degrees vertically are mounted behind a non-reflecting front, which makes it easy for spectators to see the results from any position even in direct sunlight. The intensity of the display is more than 4000 NIT. This makes the system the ideal scoreboard system for an outdoor stadium. The front are also strong enough to resist shots from hitting balls making the scoreboards very robust.

The scoreboard is easy to install, mounting brackets are supplied with every system.

Every scoreboard produced by Nautronic a/s is a high quality product and has gone through rigorous testing before leaving the factory and being shipped off to its destination anywhere in the world.
